

Dániel Pintér

Technical Product Owner | Platform, API & Frontend Products

Gödöllő / Budapest, Hungary pinter5daniel@gmail.com +36 20 826 6103 danielpinter.dev LinkedIn

PROFILE

Technical Product Owner with 9+ years across telecommunications and iGaming. I have led teams spanning SEO, FABRIC (an internal FE framework), Angular, design systems, API decoupling, and customer-facing delivery. My teams reduced time to first customer data by over 75%, improved web performance by up to 60%, and increased new-site assembly throughput to 2.2× the previous rate.

CORE SKILLS

Product direction: Platform strategy · SEO ownership · Roadmaps · Product metrics
Frontend platform: FABRIC (internal FE framework) · Angular · Design systems · Web components · Application monitoring
Platform governance: API portfolios · Consent management · Supplier evaluation · Governance
Delivery leverage: AI tooling · Automation · Product documentation · End-to-end delivery

PROFESSIONAL EXPERIENCE

Brand Experience · Product Owner Oct 2023 — Present

BETSSON GROUP

Owned SEO and FABRIC (the internal FE framework), alongside Angular, the central design system, consent management, frontend logging, and CMS direction.

- Worked with Angular and governed reusable web components, CMS integration, supplier evaluation, and platform documentation.
- Built AI-assisted internal tools and automated repetitive product workflows.
- Improved LCP, INP, and TTFB by up to 60% while isolating failures to prevent full-site outages in the migrated scope.
- Increased new-site assembly throughput to approximately 2.2× through modular web components and the shared design system.

Capability Product Owner May 2022 — Oct 2023

DEUTSCHE TELEKOM IT SOLUTIONS

Owned the full Customer Data Platform capability and its API portfolio while leading two multicultural Scrum teams.

- Held end-to-end delivery responsibility in SAFe, aligning omnichannel frontend use cases with architecture, sequencing, operational requirements, and SLAs.
- Steered technical solutions including Thales encryption and validated the capability with compliance and security teams for approval.
- Reduced time to first customer data in Telekom shops by more than 75% and full-profile load time by 60%.
- Improved My Profile page loading by 40% for fixed-line customers while enabling fixed-mobile profile and contracting-party matching.

IT Application Manager & Business Analyst Jan 2019 — May 2022

DEUTSCHE TELEKOM GMBH

Planned and integrated B2B business and presales requirements across Salesforce, CRM, and other enterprise applications.

- Created and validated specifications for external suppliers, and introduced Scrum to improve delivery with internal teams and partners.
- Co-led the IT Functions workstream as a solution designer and led its user-management substream as 50+ internal systems were consolidated into one three-module platform.
- Established a single authorization and identity-verification point, reducing associated maintenance cost by more than half.
- Defined more than 50 operation-level roles and contributed to high- and low-level solution design.

Business Analyst Trainee Jan 2017 — Mar 2019

DEUTSCHE TELEKOM

Supported internal business applications through configuration, interface customization, first-line support, and continuity activities.
